Education

Ramdeobaba University, Nagpur 2024 – 2028
B.Tech. in Computer Science and Engineering *CGPA: 8.53/10*

Technical Skills

Languages: C, C++, Python, Java, JavaScript, SQL

Frontend: React, HTML, CSS, Leaflet

Backend & APIs: FastAPI, REST APIs

ML & GIS: XGBoost, OpenStreetMap, OSRM

Tools & Platforms: Git, GitHub, Linux, Render

CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks

Projects

Smart City Traffic Management & Navigation System | Python, XGBoost, React, FastAPI, Leaflet Live Demo

- Architected and deployed on Render a full-stack GIS platform for Nagpur with a React and Leaflet frontend and a FastAPI backend, enabling interactive congestion visualization and route planning.
- Trained an XGBoost classifier on synthetic traffic data to forecast Low, Medium, and High congestion 15 minutes ahead, powering proactive routing.
- Integrated OpenStreetMap road networks with OSRM to compare alternate paths against predicted congestion and recommend the most efficient route.

Smart IV Drip Monitoring System | IoT

- Contributed to an IoT prototype that improves patient safety through automated IV monitoring and real-time alerts.
- Designed modules for fluid-level sensing, blood backflow detection, automatic valve control, and vital-sign monitoring.

CarbonTrack SME – Carbon Footprint Estimator | HTML, CSS, JavaScript Ongoing

- Building the responsive frontend of a web app that lets small and medium-sized enterprises estimate and understand their carbon footprint.

Research & Activities

6G Security Research In Progress

- Co-authoring a research paper on security challenges and emerging threat considerations in next-generation 6G networks.

Blockchain Students Chapter | Ramdeobaba University Member

Achievements

- **2nd Place**, Hacksagon 2026 (2,100+ participants) – Smart IV Drip Monitoring System
- **2nd Runner-up**, Ideathon, RCOEM TBI – Smart IV Drip Monitoring System
